NOT CLEARED. The assessment is specialist review required: 0 contradiction(s), 0 missing document(s), 2 item(s) for specialist review. Resolve them before these values are used. 1 correction change(s) made after this assessment are NOT included in these values. Recompute first.

Pre-fill for the authorised declarant. These are values READ from the trade documents by CargoClear (and corrected by the agent where stated), not a filed declaration and not a customs determination. Check every value against the source document before it is used; fields marked for review need a person's eyes. The duty figures are an indicative estimate, never an amount payable.

Assumed: insurance is not stated: the default 1.125 % of the FOB value is applied
Assumed: exchange rate USD to INR = 85 (ILLUSTRATIVE rate, not a customs notification; for India the applicable rate is the one in force when the Bill of Entry is presented (no date is applied here))
Assumed: the anti-dumping rate is an illustrative reference entry (no notification, producer-specific in practice)
Assumed: duty rates: demo-curated data, not verified
Assumed: exchange rates: demo-curated data, not verified
Assumed: valuation defaults: demo-curated data, not verified
Assumed: anti dumping: demo-curated data, not verified
Indicative estimate for the authorised Custom House Agent. Not a customs determination and not an amount payable; rates and rules come from the reference data named above.

Findings to resolve

Finding	Level	What the check found
SEC-001	Review	Heat TH-77121 reports Cr 0.28%, within 20 % below the 0.3 % at which HS Note 1(f) makes steel alloy, while the goods are declared non-alloy. A steel kept just under a threshold is a known way of staying in another tariff code: have the certificate verified.
SEC-002	Review	Anti-dumping duty may apply: HS 7304.31.00 (declared) from CHINA: Seamless tubes, pipes and hollow profiles of iron or steel (ILLUSTRATIVE scope), 12 % of the assessable value (entry ADD-IN-7304-CN-ILLUSTRATIVE; notification not supplied). The rate is producer-specific: a specialist must confirm the producer and the notification. It is included in the indicative duty estimate.

To be supplied by the declarant (on no trade document)

Importer-Exporter Code (IEC) of the importer; GSTIN of the importer; Customs House Agent licence / broker code of the declarant; Customs port (station) of import; Valuation method and related-party (relationship) declaration; Exemption notification or preferential-origin claim, if one is made; Bill of Entry number and date (assigned when the declaration is filed).
demo-curated: What a customs declaration typically needs that trade documents do not carry, as encoded for this prototype; the reviewer is to confirm each entry against the current declaration form; not an official source
